Descartes Quadruples

Descartes Quadruples

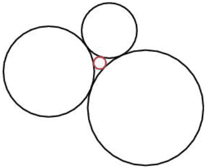
Definition

A *Descartes Quadruple* is a set of four mutually tangent circles with disjoint interiors.

Descartes Quadruples

Definition

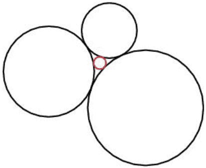
A *Descartes Quadruple* is a set of four mutually tangent circles with disjoint interiors.

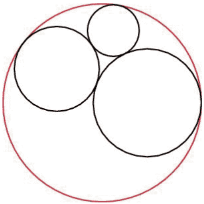


Descartes Quadruples

Definition

A *Descartes Quadruple* is a set of four mutually tangent circles with disjoint interiors.

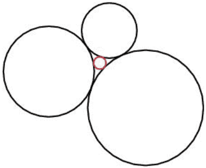


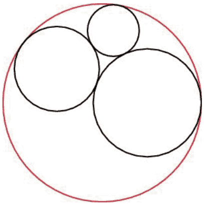


Descartes Quadruples

Definition

A *Descartes Quadruple* is a set of four mutually tangent circles with disjoint interiors.



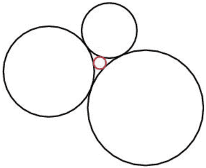


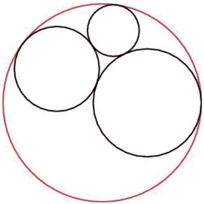
We can only have at most one "inverted" circle!

Descartes Quadruples

Definition

A *Descartes Quadruple* is a set of four mutually tangent circles with disjoint interiors.





We can only have at most one "inverted" circle!

Theorem of Apollonius

If three circles are mutually tangent, there are two other circles that are tangent to all three.

The Descartes Equation

Clyde Kertzer & Summer Haag

The Descartes Equation

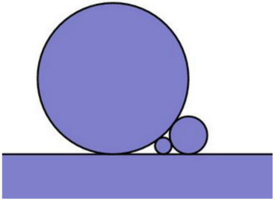
Definition

The *curvature* of a circle with radius r is defined to be $1/r$.

The Descartes Equation

Definition

The *curvature* of a circle with radius r is defined to be $1/r$.

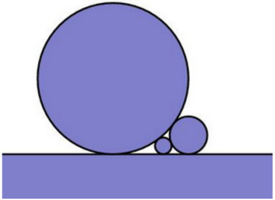


Quadruple with one circle of infinite radius

The Descartes Equation

Definition

The *curvature* of a circle with radius r is defined to be $1/r$.



Quadruple with one circle of infinite radius

Descartes Equation

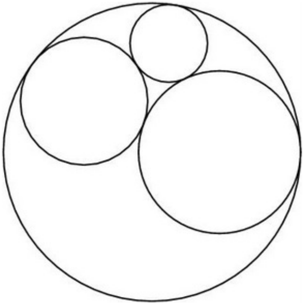
If four mutually tangent circles have curvatures a, b, c, d then

$$(a+b+c+d)^2 = 2(a^2+b^2+c^2+d^2).$$

If a, b, c, d are integers, the rest are also integers!

Apollonian Circle Packings

If a, b, c, d are integers, the rest are also integers!



Apollonian Circle Packings

If a, b, c, d are integers, the rest are also integers!

Try with $12 = 6 \cdot 2$:

$$\left[-xy,\ x(x+y),\ y(x+y),\ (x+y)^2 - xy\right] =$$

$$\left[-2 \cdot 6, 2(2+6), 6(2+6), (2+6)^2 - 2 \cdot 6\right] =$$

$$[-12,\ 16,\ 48,\ 52] = [-3,\ 4,\ 12,\ 13] \quad (x = 3, y = 1)$$

Symmetric Packings

Theorem

All reduced primitive symmetric quadruples with distinct a, b, c, d *are of the form*

$$\left[-xy, x(x+y), y(x+y), (x+y)^2 - xy\right].$$

with $\gcd(x, y) = 1$.

Symmetric Packings

Packings where one of the numbers is the same:
